

3M™ Easy Trap Use with Non-Easy Trap Holder – Instructional Sheet

Step 1: Utilizing the perforations, tear a piece of 3M™Easy Trap Dusting material at least as long as the width of the holder.	
Step 2: Place the 3M™Easy Trap Dusting material flat on the floor.	
Step 3: Center the holder directly over the 3M™Easy Trap Dusting material. Press down firmly on the holder to secure. Note: If using a 3M™Doodleduster holder, you may wrap any excess around the holder and use the clips to further secure the 3M™Easy Trap Dusting material in place.	
Step 4: You are ready to begin dusting and picking up 6X more dust, dirt, hair and sand than traditional mops and other traditional dusting systems.	
Step 5: Both sides of the 3M™Easy Trap dusting material can be used. - Dust and debris will begin loading at the leading edge of the cloth. - Continue to use the cloth until it is fully loaded. - The cloth is fully loaded when debris or dust particles exit the trailing edge.	

Step 6: Start with the 3M™Easy Trap dusting material and holder on the floor. Hold down the 3M™Easy Trap dusting material and gently lift the holder off the material. Flip the 3M™Easy Trap dusting material over so the loaded side (ie dirty side) is facing upwards. Note: If using the 3M™Doodleduster holder, you will have to release the clips in order to lift the holder from the material.	
Step 7: Center the holder directly over the 3M™Easy Trap Dusting material. Press down firmly on the holder to secure. Note: If using a 3M™Doodleduster holder, you may wrap any excess around the holder and use the clips to further secure the 3M™Easy Trap Dusting material in place.	
Step 8: You are ready to begin dusting and picking up 6X more dust, dirt, hair and sand than traditional mops and other traditional dusting systems.	
Step 9: When both sides of the cloth are completely soiled, remove and dispose of loaded 3M™Easy Trap dusting material. Go back to Step 1 to replace the 3M™Easy Trap dusting material.
