IN EDUCATION

Justick™ by Smead is an innovative solution that leverages Justick Surface Technology, using proprietary electro adhesion, to post campus announcements, classroom lessons or to create teaching manipulatives. Justick in education is a powerful collaboration tool for classrooms that unleashes the power of creativity and helps to maintain student involvement with manipulatives and templates.

How it works

- Electro adhesion surface on bulletin, dry-erase and commercial boards; documents simply stick to the surface
- Write on the clear overlay with documents under the surface to create lessons or brightly colored announcements

Applications on campuses or in classrooms

- A powerful collaboration tool for classrooms, small groups or one-on-one tutoring
- Directional signs for regional or department training seminars or campus open houses
- Campus announcement walls for student notices
- Campus welcome signs with campus directives
- Showcase and protect student creations in classrooms, hallways and other common areas
- Tracking, scheduling or planning for staff with the use of a custom template under the clear overlay

Justick bulletin boards don't require push pins, magnets or tape, eliminating damage to posted items and to the board surface. These boards allow for fast positioning and repositioning of artwork, teaching tools or bulletins. The black surface creates impactful visuals.

Write. Display. Interact!

Justick dry-erase boards have an electro adhesion surface to hold lesson plans and have a clear overlay for use with dry-erase markers. Use a template to create an inexpensive, customizable planning, scheduling or tracking board for classroom or staff activities. Mini boards can be used for one-on-one or small group tutoring sessions.
