

We’re making it easier for you

With your needs in mind, we deconstructed, re-imagined and then redesigned our shopping process. These new features will help us serve your needs more quickly and efficiently than ever.

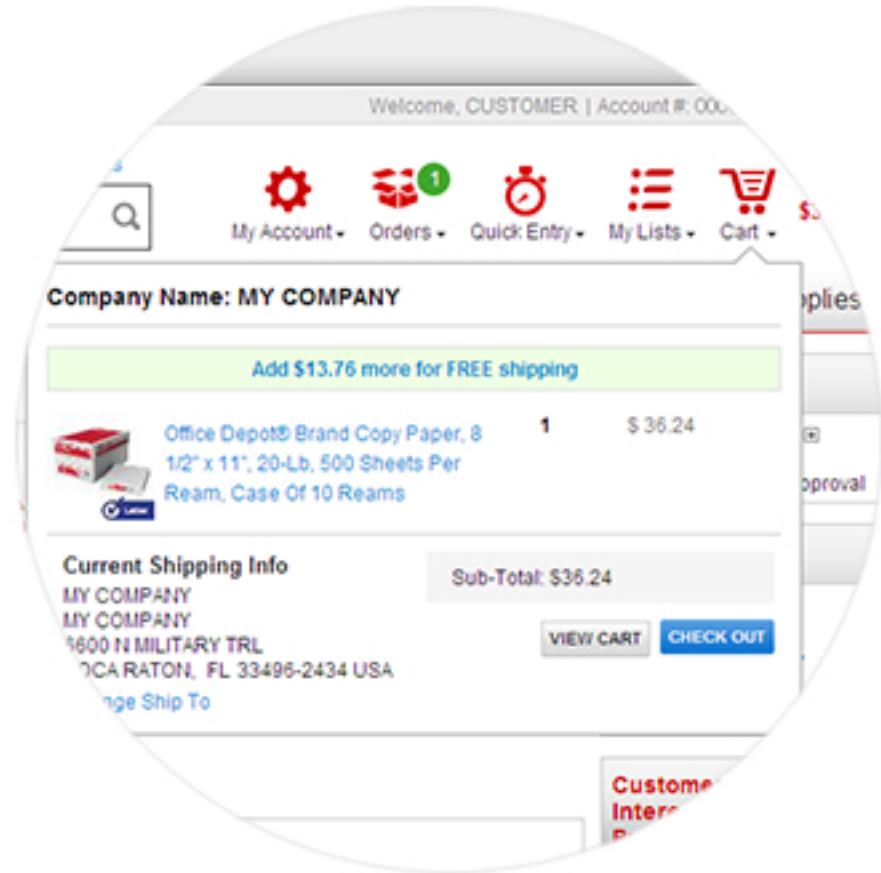

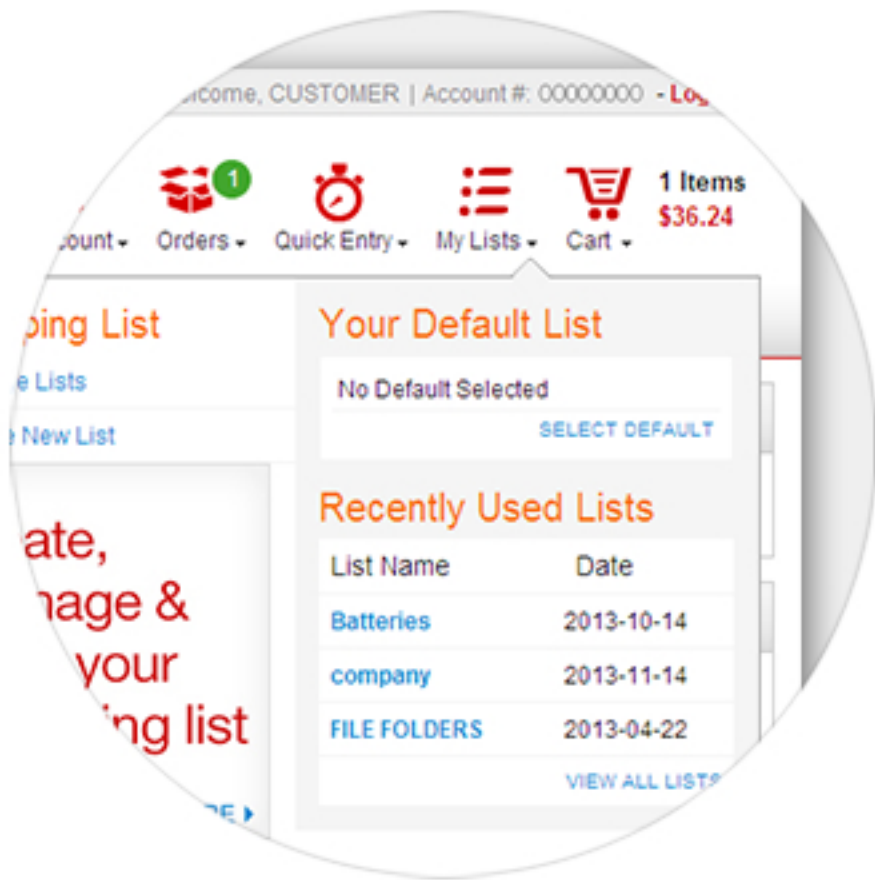

With your needs in mind, we deconstructed, re-imagined and then redesigned our shopping process. These new changes will help us serve your needs more quickly and efficiently than ever.

We’ve streamlined our design and navigation functions to give you the fastest, most effective shopping experience possible. So come check out what’s new.

A few of my favorite things... “My Lists” Tracker

This new feature makes it simple to place your favorite items in a new shopping list. Then at any point during your shopping experience, you can quickly search by list name and date to access and/or modify your most recently used and default lists.

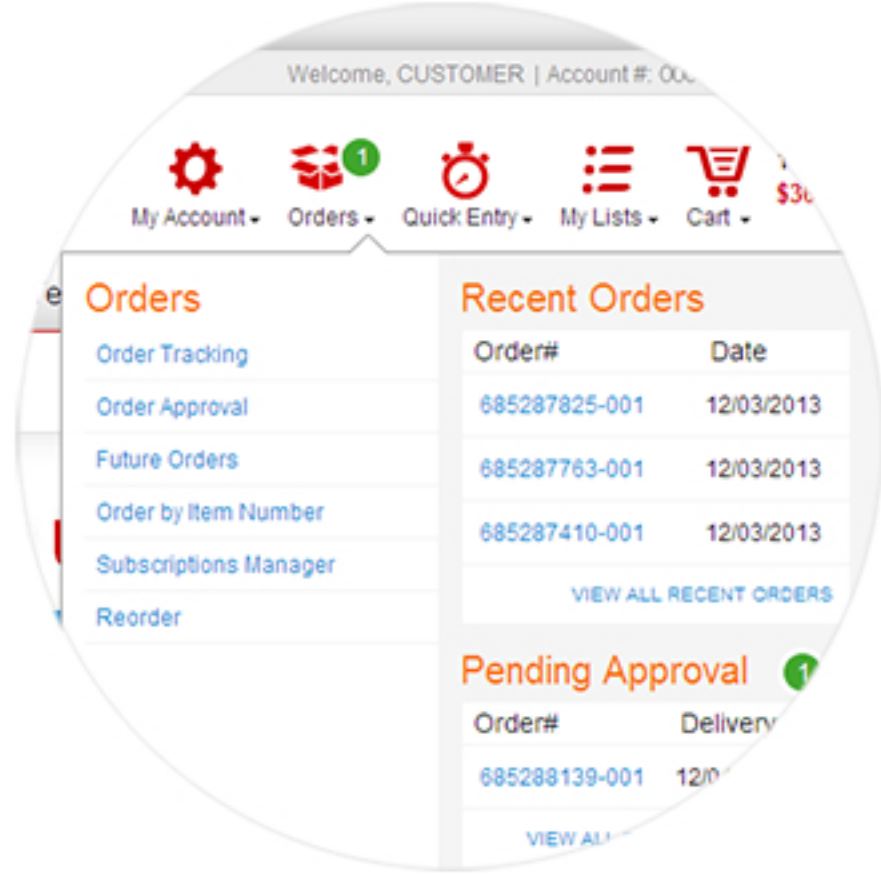

Total control of your cart Improved Shopping Cart Display/Management

Now you can view images of all the items in your shopping cart whenever you want. Then you can simply hover over the cart icon to view or change your shipping address and other information at any time.

See the big picture Snapshot View of Your Favorite Item Categories

Get an instant overview of any product category. When you don’t necessarily want to browse individual items, our improved product menu displays offer a quick and handy snapshot view of the product categories that interest you most.

We follow orders “Recent Order” Tracker

Quickly determine status and other relevant information regarding your recently placed orders. This new flyout box lets you easily refer to the order number and delivery date for your 3 most recently placed orders at any point during your shopping experience.

Account for everything “My Account” Tracker

Instantly access all reports and other key information regarding your account. This new flyout box saves you time by letting you easily access reports and other critical information about your account. You can do this at any point during your shopping experience.
