

Buy More, SAVE MORE with HP Original HP Toners

Today you probably buy the “Standard Yield A Cartridge” and could benefit from incremental cost savings by switching to Dual Packs (D) and High-Yield (X) cartridges.

■ HP LaserJet Dual Packs (D)

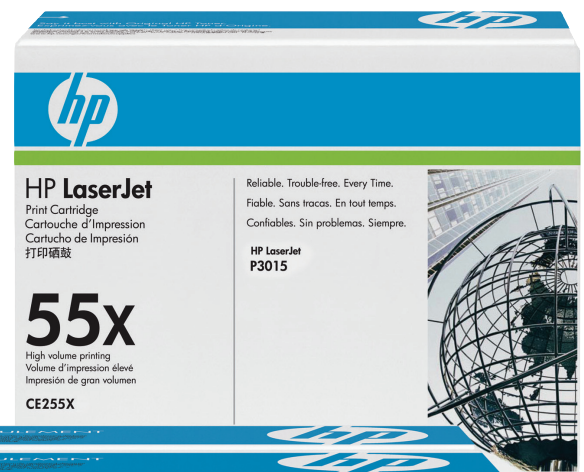

Dual Packs, versus single cartridges, are ideally suited for high-volume printing environments and offer the time-savings benefit of only having to order, track and ship one Item #. It saves you time while reducing handling and shipping expenses.

■ HP LaserJet High-Yield (X)

High-Yield print cartridges for high-volume printing environments provide excellent value, print more pages than a single cartridge, and are replaced less frequently – increasing productivity and saving you time and money.

It is easy to find out what type of cartridge you are using right now: Look at the HP cartridge part number and the suffix letter to determine what version of the product you are buying A, X or D.
